#### Amendments to the Claims

- 1. (Currently Amended) A method of increasing cytosolic  $Ca^{2+}$  levels in an airway epithelial cell comprising contacting P2X receptors on the cell with an effective amount of  $Zn^{2+}$  and one or more of the following molecules:  $Zn^{2+}$ ; ATP; ivermectin;  $\alpha$ ,  $\beta$ -methylene-ATP; benzoyl-benzoyl-ATP; ATP $\gamma$ S; or AMPPNP, wherein there is a sustained elevation in cytosolic  $Ca^{2+}$  levels in the cell.
- 2. (Original) The method of claim 1, wherein the P2X receptors are not contacted with zincum gluconium.
- 3. (Original) The method of claim 1, wherein the  $Zn^{2+}$  is in the form of zinc chloride.
- 4-11. (Canceled).
- 12. (Currently Amended) The method of claim 1, further comprising
  - a. contacting the cell with an effective amount of ATP, or
  - reducing the cell's extracellular Na+ or contacting the cell with a
    Zn<sup>2+</sup> containing solution with low Na+, or
  - c. alkalinizing the cell's extracellular fluid or contacting the cell with an alkaline solution containing  $Zn^{2+}$ , or
  - d. reducing the cell's extracellular  $Mg^{2+}$  or contacting the cell with a  $Zn^{2+}$  containing solution with low  $Mg^{2+}$ , or
  - e. increasing the cell's extracellular Ca<sup>2+</sup> or contacting the cell with a Zn<sup>2+</sup> containing solution with high Ca<sup>2+</sup>, or
  - f. any combination of steps a-e.
- 13. (Currently Amended) A method of treating an airway disease in a subject, comprising contacting epithelial cells in the trachea, bronchi, bronchioles, or alveoli of a subject with

an effective amount of  $Zn^{2+}$  and one or more of the following molecules:  $Zn^{2+}$ ; ATP; ivermectin;  $\alpha$ ,  $\beta$ -methylene-ATP; benzoyl-benzoyl-ATP; ATP $\gamma$ S; or AMPPNP, wherein there is a sustained elevation in cytosolic  $Ca^{2+}$  levels in the cell.

14-20. (Canceled).

- 21. (Currently Amended) The method of claim 13, further comprising
  - (a) contacting the cell with an effective amount of ATP, or
  - (b) reducing the cell's extracellular Na+ or contacting the cell with a Zn<sup>2+</sup> containing solution with low Na+, or
  - (c) alkalinizing the cell's extracellular fluid or contacting the cell with an alkaline solution containing Zn<sup>2+</sup>, or
  - (d) reducing the cell's extracellular  $Mg^{2+}$  or contacting the cell with a  $Zn^{2+}$  containing solution with low  $Mg^{2+}$ , or
  - (e) increasing the cell's extracellular Ca<sup>2+</sup> or contacting the cell with a Zn<sup>2+</sup> containing solution with high Ca<sup>2+</sup>, or
  - (f) any combination of steps a-e.
- 22. (Currently Amended) The method of claim 13, wherein the contacting step is performed with a  $Zn^{2+}$  [;] and ATP; ivermectin;  $\alpha$ ,  $\beta$ -methylene-ATP; benzoyl-benzoyl-ATP; ATP $\gamma$ S; or AMPPNP-containing inhalant, nebulization, aerosol, or instillant.
- 23. (Currently Amended) The method of claim 13, wherein the  $\frac{Zn^{2+}}{Zn^{2+}}$  is in the form of zinc chloride (ZnCl<sub>2</sub>).

24-36. (Canceled).

- 37. (Withdrawn) A composition comprising zinc and a saline solution, wherein the saline solution has low Na+, is enriched with Ca<sup>2+</sup>, and is modified to an alkaline pH.
- 38. (Withdrawn) A nasal spray, nebulizer, or aerosol inhaler comprising the composition of claim 37.

39-40. (Canceled).

- 41. (Withdrawn) The composition of claim 37, wherein the zinc is not in the form of zincum gluconium.
- 42. (Withdrawn) A method of treating a bacterial infection in a subject, comprising administering to the subject the composition of claim 37.
- 43. (Withdrawn) A method of reducing inflammation in a subject, comprising administering to the subject the composition of claim 37.
- 44. (Withdrawn) A method of treating polycystic kidney disease in a subject, comprising administering to the subject the composition of claim 37.
- 45. (Withdrawn) A method of treating a subject with an endocrine disorder, comprising administering to the subject the composition of claim 37.

46-47. (Canceled).

- 48. (Withdrawn) A method of screening for an airway epithelial Ca<sup>2+</sup> entry channel agonist, comprising
  - (a) contacting an airway epithelial cell with a test compound;

- (b) detecting calcium levels in the airway epithelial cell; and
- (c) screening for a sustained elevation in calcium as compared to a control level, indicating an airway epithelial Ca<sup>2+</sup> entry channel agonist.
- 49. (Withdrawn) The method of claim 48, wherein the Ca<sup>2+</sup> entry channel is selected from the group consisting of a P2X purinergic receptor Ca<sup>2+</sup> entry channel, a transient receptor potential (TRP) Ca<sup>2+</sup> entry channel, a store-operated Ca<sup>2+</sup> (SOC) entry channel, a calcium release activated channel (ICRAC), and a CAT-1 Ca<sup>2+</sup> entry channel.
- 50. (Withdrawn) The method of claim 48 further comprising the step of:
  - (d) screening for reversibility of response by removing the agonist during the assay.
- 51. (Withdrawn) The method of claim 50, further comprising the step of:
  - (e) screening for dependence upon extracellular Ca<sup>2+</sup> by repeating the assay in a solution devoid of extracellular Ca<sup>2+</sup>.
- 52. (Withdrawn) The method of claim 48, wherein the airway epithelial cell is a cystic fibrosis airway epithelial cell.
- 53-57. (Canceled).
- 58. (Withdrawn) The method of claim 48, wherein the airway epithelial cell is in a solution containing an effective amount of ATP.
- 59-60. (Canceled).
- 61. (Withdrawn) The method of claim 48, wherein the airway epithelial cell is in a solution containing an effective amount of zinc.

- 62-63. (Canceled).
- 64. (Withdrawn) The method of claim 48, wherein the airway epithelial cell is in an alkaline solution.
- 65-141. (Canceled).
- 142. (New) The method of claim 1, further comprising reducing the cell's extracellular Na+ or contacting the cell with a Zn<sup>2+</sup> containing solution with low Na+.
- 143. (New) The method of claim 1 or claim 142, further comprising reducing the cell's extracellular Mg<sup>2+</sup> or contacting the cell with a Zn<sup>2+</sup> containing solution with low Mg<sup>2+</sup>.
- 144. (New) The method of claim 1, further comprising contacting the cell with an effective amount of ATP; reducing the cell's extracellular Na+; alkalinizing the cell's extracellular fluid; reducing the cell's extracellular Mg<sup>2+</sup>; and increasing the cell's extracellular Ca<sup>2+</sup>.
- 145. (New) The method of claim 142, wherein the cell's extracellular Na+ is reduced by using an effective amount of amiloride.
- 146. (New) The method of claim 142, wherein the cell's extracellular Na+ is reduced by substituting Na+ with N-methyl-D-glucamine (NMDG).
